

Finnish Society of Telemedicine and eHealth
Suomen Telelääketieteen ja e-Health seura

Finnish Society of Telemedicine and eHealth

Finnish Society of Telemedicine and eHealth is an important forerunner in the field of telemedicine and eHealth in Finland as well as internationally.

We have a close collaboration with other national and international organisations, health care service providers and users. The purpose of the society is to promote education and development in the field of telemedicine and eHealth.

Our Versatile Activities Include

- Development of professional expertise
- Seminars, presentations, training courses, workshops, symposia
- Publications (both printed and electronic) – membership journal Finnish Journal of eHealth and eWelfare and annual national conference abstracts book
- Support to academic research
- Evaluations and statements of current issues
- Collaboration with international organisations

Our communication network includes both national and international experts and organizations.
